

## FA360WY

2J Xenon beacon, White shallow base, Yellow/Amber lens

### General

---

The FA360WY is a general purpose 2J Xenon beacon for fire alarm applications. Which features a special base containing all wiring connections and allow for easy removal/placement of the beacon.

### Easy and Fast Installation

---

The FA360WY beacon allows faster installation and maintenance thanks to an innovative mounting base. Dispensing with the need for locking screws, these sounders use TimeSaver™ bases from the 630 series detectors. Heads are simply locked onto the base with a “twist and click” action, allowing fitting or removal at any time because the base is the only component that needs to be wired. As the cabling requirement is reduced, commissioning time and costs are naturally reduced as well.

### Efficient and versatile

---

The mechanism for locking the beacon to the base, can be activated if required. Once activated, a special tool is required to remove the sounder from the base.

The FA360WY beacon utilises a full faced translucent sounder case, giving a much larger lens area and a greater spread of light.

### Standard Features

---

- 2J Xenon flash
- Anti-Tamper locking mechanism
- Shallow mounting base
- Wiring directly to base
